

JOHN SMITH

212-555-1234 • john.smith@baruchmail.cuny.edu • [linkedin.com/in/johnsmith](https://www.linkedin.com/in/johnsmith) • github.com/johnsmith

EDUCATION

CUNY Baruch College

Bachelor of Science in Computer Science, Minor in Mathematics

GPA: 3.7/4.0

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Architecture

New York, NY

Expected May 2027

AWARDS

Presidential Scholarship

Sep. 2024

2nd Place at Baruch Hackathon

Mar. 2026

EXPERIENCE

Goldman Sachs

Software Engineering Summer Analyst

New York, NY

Jun. 2026 – Aug. 2026

- Developed an automated reconciliation service in Python which reduced manual processing time by 45%
- Built a REST API with Spring Boot and PostgreSQL that serves 2 million daily trade records to 3 internal dashboards
- Wrote unit and integration tests which raised code coverage from 60% to 90% on the team's core module

Baruch College Career Center

Student Assistant

New York, NY

Sep. 2025 – Present

- Assisted 200+ students with resume reviews by providing detailed feedback which improved their interview callback rate
- Automated employer contact tracking by writing Excel macros which saved the office 5 hours per week

Trader Joe's

Crew Member

Brooklyn, NY

Jan. 2024 – Aug. 2025

- Reorganized the stockroom layout by grouping high-turnover items near the floor which cut restocking time by 20%

RESEARCH EXPERIENCE

Baruch College, Department of Mathematics

Undergraduate Research Assistant

New York, NY

Jan. 2026 – May 2026

- Implemented a link-prediction model for citation graphs in PyTorch which raised AUC from 85% to 94% over the baseline

LEADERSHIP AND PROJECTS

Baruch Computer Science Club

Vice President

New York, NY

Sep. 2025 – Present

- Led weekly technical workshops for 30+ members on Git and data structures which doubled active membership
- Organized a 24-hour hackathon with \$2

NYC Subway Shortest Path

Python, Flask, JavaScript

github.com/johnsmith/subway

Mar. 2026

- Built a route-finding web app using Dijkstra's algorithm on a graph of 472 stations which returns routes in under 50 ms
- Designed a Flask backend and responsive frontend which lets users query any station pair and view the route on a map

SKILLS, INTERESTS, AND CERTIFICATIONS

Skills: Python, C++, Java, JavaScript, SQL, Git, Linux, AWS

Certifications: AWS Certified Cloud Practitioner

Interests: Competitive programming (Codeforces rating 1600), marathon running (completed 3 marathons), chess (club tournament director)
